  - School Name Search
 - School Type Search

How To Search for an Address

1. Select the "Address" search button located on the top "Search" panel.
2. A new tab, containing a text box, will appear in the left panel, called "Address search".
3. Start typing the address into the text box and select one of the autocomplete suggestions.
4. Click Submit.
5. A new tab, containing the address search results, will appear in the left panel, called "Results".
6. Select the search result for a more detailed view of the data.
7. Exit out of the "Results" tab to clear all results from the map.

③ Map Tools

Use the map tools to deepen your analysis. Identify features, conduct measurements, create bookmarks, share the map display, and print a map layout.

⑤ Map Navigation

Use the Map Navigation tools to alter the map view.

- Zoom the map view IN closer to the data.
- Zoom the map view OUT closer to the data.
- Zoom the map view OUT to the original map view.
- Reset the map compass orientation back to NORTH.
