

Coffee Filter Rose Craft

Supplies needed

- Three coffee filters per rose
- Pipe cleaner
- Markers
- Tape
- Spray bottle
- Water

Step one

Color or draw different patterns with the markers on one side of all three coffee filters.

Step two

Choose one coffee filter to be the center of the flower. Pinch the center of the coffee filter until the ends of the coffee filter come together. Set aside. This is your first petal.

Step three

Take the second coffee filter and fold it in half. Put the first coffee filter on top of the folded second coffee filter. Make the sides parallel to the folded side of the first filter.

Coffee Filter Rose Craft

Step four

Use a small piece of tape and secure the centers of both filters. Start from the left and roll both coffee filters loosely to the right, making sure the centers of both filters stay together. This will take the shape of petals. Squeeze the bottom of the petals together and secure with tape.

Step five

Repeat steps three and four with the third coffee filter.

Step six

Attach pipe cleaner to the bottom of the petals with tape.

Step seven

Use the spray bottle with water to lightly mist the petals for the colors to spread.
